DETAILED ACTION

Election/Restrictions

In response to the Election made on 20 June 2003. The Examiner withdraws the restriction. A new restriction is set forth below.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims, 1-19, drawn to Header or manifold making, classified in class 29, subclass 890.052.
- II. Claims, 20-22, drawn to Vibratory treatment, classified in class 156, subclass 73.6.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as infra-red welding.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
